

Paul Bottrill is an international executive with a successful track record in the development and direct management of large complex projects incl. transit (heavy rail, light rail, road, bridges, water, security, University accommodation and health sectors).

Knowledgeable in a wide range of development models, corporate structures, project management offices and parent company capital objectives.

Paul has proven ability to operate at corporate and project level within large organisations on international platforms incl. group companies in Mitsubishi Corporation, Serco and Anglian Water.

He is a respected leader of people and nurturer of team talent with gravitas and excellent partnering abilities. He builds strong business relationships with small development teams in large multinational groups.

An excellent appreciation of the key drivers for partners when formulating win strategies (market entry, new in country and project level plans) to meet client objectives and deliver commercially viable solutions for the consortium.

In 2018, he was appointed Senior Vice President Development Americas, CRRC MA where he originates new investment opportunities in transportation PPP's.

In 2016, he was appointed Senior Vice President Asset Development, Kiewit's Infrastructure Division where he originates new investment opportunities in transportation & water PPP's in North America.

In 2012, he was appointed Executive Director, Mitsubishi Corporation's Infrastructure Division where he successfully worked for 3 years originating new investment opportunities and leading the bidding process in water and transportation PPP's in Brazil, Middle East, SE Asia and Australasia.

In 1999, Paul completed a sponsored Executive MBA with Anglian Water. He majored in Organisational Change Management to support his career development in large corporates with significant business complexities.
