

*Sam Morrissey is manager of the California and Nevada planning and environmental technical excellence center for transportation at WSP USA, formerly WSP | Parsons Brinckerhoff, a leading engineering and professional services consultancy.*

Mr. Morrissey has nearly two decades of experience in the transportation industry with both the private and public sector, covering broad areas of project management and delivery, as well as marketing, business development, and client relations. Recently, his focus has been on leading high-performance teams to deliver actionable solutions to public agencies in the areas of bus rapid transit, connected and automated vehicles, and emerging transportation technologies.

A licensed professional engineer in California and Hawaii, Mr. Morrissey received a Master of Business Administration from the University of Southern California and a Bachelor of Science from Rensselaer Polytechnic Institute. He serves as co-lecturer for two transportation engineering and planning courses in the school of engineering at the University of California, Los Angeles.
